

# REMARKS

A reconsideration of this patent application is respectfully requested in view of the foregoing amendments and the following remarks.

The amendments to this patent application are as follows. The Specification has been amended on pages 1, 31 and 32 to include the required section headings. Pages 15, 27, 28 and 31 have been amended to correct minor typographical errors. The drawings and the Specification have been amended in order to include reference numerals and to support the language in the claims.

Pages 32a, 32b, 32c, 32d and 32e have been canceled and replaced by an appropriate amendment to the Specification.

The subject matter added to page 32 of the Specification not only includes the canceled description, but also includes the language recited by the claims.

Claims 54 to 81 have been canceled without prejudice and have been rewritten as newly added claims 82 to 109.

For all these reasons, it is firmly believed that all the claims, the drawings and the Specification are now in complete compliance with the requirements of 35 U.S.C. 112. Withdrawal of

this ground of rejection is respectfully requested.

A prompt notification of allowability is respectfully requested.

Respectfully submitted,  
Oleg STOLZ (PCT)

1st perforated sheet metal plate supporting <sup>62</sup> ~~20~~  
2nd perforated sheet metal plate (with thermal insulation)

Heat exchanger + air filter + gap seal + drum <sup>12</sup>

1st anti-twist (anti-turbulence) honeycomb <sup>10</sup>

2nd anti-twist (anti-turbulence) basket

Magnetic fixation <sup>56</sup>

Safety glass <sup>66</sup>

<sup>48</sup>  
Longitudinal bar, sealing element + control element  
for controlling the admission of air

<sup>60</sup>  
Axial sealing ~~element~~

Adjusting screw <sup>50</sup>

Effective axial sealing point

Thermal compensation, axial

Separating bottom, sound absorber, <sup>80</sup>  
removable and magnetically fixed

<sup>46</sup>  
Cross bar, sealing element

<sup>28</sup>  
Central mounting (fastening) screw (when drum is removed,  
bearing remains on cross bar)

<sup>84</sup>  
Pressure compensation, ~~element~~ + permanent dehumidifier, with  
solar regeneration

Silica gel

Expansion compensation + insulator

Blowout flow turbulence eliminator

FIG. 1a

FIG. 1b

18  
Magnetic bearing/sealing element

Pressure compensation bore

Compensation of expansion

Jet tube, transparent

Physical sound insulator 76

Exhaust air ventilator 24

FIG. 1

18  
Flow rectifier/and heat exchanger drive (twist or turbulence generator)

22  
Feed air ventilator/and heat exchanger drive (twist or turbulence generator)

58  
Axial rotor/magnetically fixed; rotor including journal bearing replaceable

Transparent

A, C, D, E and F maintained at room temperature by B

FIG. 1C

COPIED FROM FIG. 1

ROTOR:  
MAGNETIC  
THROUGHOUT

FIG. 3

FIG. 4

DETAIL DRAWING: CENTRAL BEARING + TEMPERATURE COMPENSATION

FIG. 5

DETAIL DRAWING: GLASS PANE, FRONT RING

FIG. 6
